Detailed Action

Drawing Objection

The drawings are objected to because in Fig.1, the position of the bottom ring 38 placed in the spool housing 34 is incorrect. Specifically, the bottom ring 38 should be placed on the top surface of the spool 35 and under the underside of the top face of the spool housing 34.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Objection to the Specification

The disclosure is objected to because of the following informalities:

On page 5, reference numeral "20" is not shown in any drawings.

Appropriate correction is required.

Claims Rejection - 35 U.S.C. 102(b)

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3724

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 6 and 8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Ballas et al. (U.S. Patent No. 4,035,912).

Ballas et al. disclose a line trimmer head comprising a spool housing (48,49) for housing a spool (52A) of cutting line; biasing means (59A) in the form of a spring for biasing the spool (52A) towards the top (48) of the spool housing (48,49); forcing means (55A) for forcing the spool (52A) towards the bottom (49) of the spool housing (48,49) against the biasing means (59A); spinning means (29,13) for spinning the spool housing (48,49), and wherein the inner surface of the top (48) of the spool housing includes mechanical members (53A) which engage with mechanical members (54A) on the top of the spool (52A) such that the spinning means (29,13) cause the spool (52A) to spin in conjunction with the spool housing (48,49) as claimed.

With regard to claim 6, Ballas et al. clearly show, in another embodiment, the spinning means can be an electric motor (103, see Fig.7) rather than a gasoline-powered engine (13).

Claims Rejection - 35 U.S. C 103(a)

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 7 is rejection under 35 U.S. C 103(a) as being unpatentable over Ballas et al. (U.S. Patent No. 4,035,912) in view of Nakamura et al. (U.S. Patent No. 5,027,591).

The line trimmer head of Ballas et al. as set forth shows all the claimed structure except Ballas et al. use a gasoline-powered engine (13) rather than the claimed hydraulic motor.

However, it is well known in the art to use a hydraulic motor for generating motion as evidenced by Nakamura et al. (see column 8, lines 37-39).

In view of this fact, it would have been obvious to one skilled in the art at the time the invention was made to power the line trimmer of Ballas et al. by a hydraulic motor rather than a gasoline-powered engine. The modification is obvious since it would only involve selecting one known type of power means for another for driving a grass-cutting device.

Indication of Allowable Subject Matter

1. Claims 3-5 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

2. Claims 10-17 are allowed.

Prior Art Citation

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Perdue is cited as art of interest.
